

Draft Primary Care Commissioning Strategy 2016-2020/21

Robert Payne, Head of Primary Care
Ann Bond, Principal Primary Care Lead
Karen Stratford, Programme lead

Background

- Our Primary Care strategy forms part of our Sustainability and Transformation plans
- General Practice continues to be the **Foundation of the local Health System**
- **Approximately 25%** of GP Practices in Dorset have a number of vulnerable factors = **179, 000 Patients**
- We seek to build on past successes and **work in Larger Groups** to achieve Sustainability with all Practices working At Scale **by**

2020/21

Dorset's Health

Engagement

- **Phase 1** - Concluded in October
 - **GP Members and Teams** – June, July and August
 - **Patient and Public Engagement Group** - September
 - **Wider Stakeholders**, including providers, patients and public representatives
- **Phase 2** – Rolling Programme of **Engagement** over the 5 years (detailed in the plan)

Our Guiding Principles

- Working in partnership to understand local need and how new models of care can address this
- **Developing Local Blueprints** to deliver this
- Overall aim to improve **Quality, Outcomes and Access to care**

Strategy on a Page

Primary Care Commissioning Strategy 2016-2020/21

Provider Development

Primary Care 2016

- Independent practitioners
- GP partnerships
- Small individual practices serving populations of c. 2,000 – c. 30,000
- High variation between individual practices in terms of services offered
- Little inter-practice working to deliver care

Transformation Programme

Commissioning and Contracting

Integrated Care

Workforce

Estates

Technology

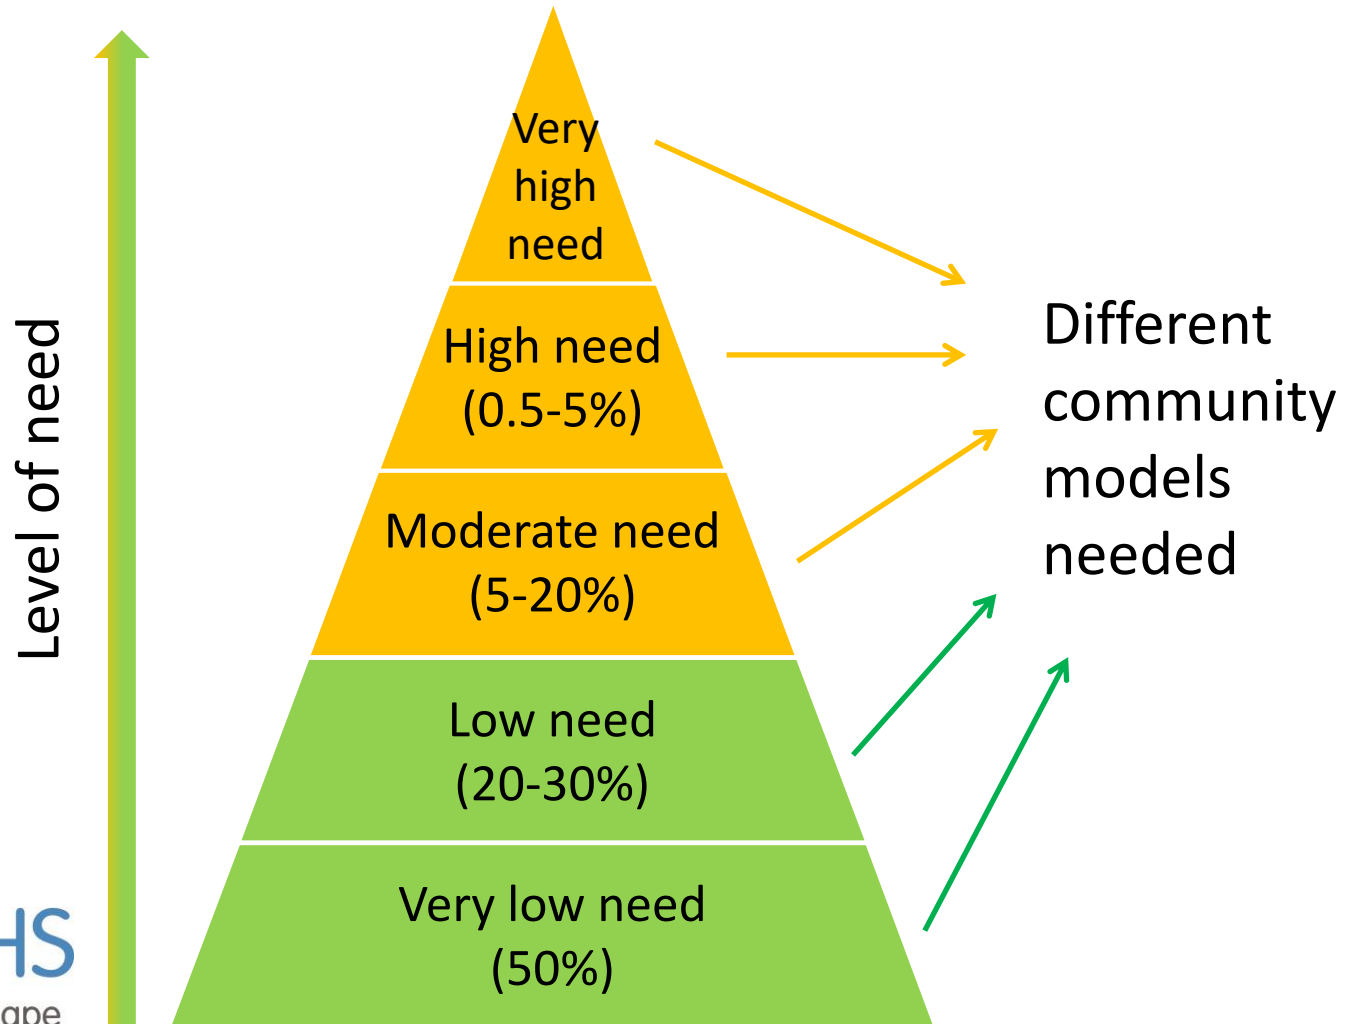

Primary Care 2020/21

- Sustainability in General Practice and built in resilience
- Groups of practices working together at scale
- New GP Models
- New collaborative arrangements with multi-disciplinary teams

Commissioning

Dorset CCG is a GP Member organisation which is now also responsible for the commissioning of General Practice Services. This Strategy therefore signals the clear commissioning intent for the future, however it also describes an element of provider development which, in line with national direction via the GP Forward View, is required to achieve sustainable GP services. Dorset CCG expects this role to reduce over time, as GP providers stabilise, strengthen and transform.

Future Model

Future Model

- **Integrated Care** based on population need
- **Multi-Disciplinary Teams across Primary and Community Services**
- **Network of GP Practices and / or Primary Care and Community Service Hubs**

GP Model

	Current Care Models	Future Care Models
1	Hospital centred disease specific, specialist led often by GP referral	Community based teams and services in-reaching into specialist care centres. Teams bring together GP, specialists, nursing and therapy
2	Lack of capacity, often hospital led	Patient centred care planning with a named GP, health and social care co-ordination, rapid access to assessment, diagnosis, individual treatment and management plans, more responsive to intensive home based care needs, virtual ward models
3	Patient care managed by GP and Consultant by referral with care often not co-ordinated	Promoting self-management and pro-active self-care. Empowering patients and supporting carers, mobilising local community resources around groups of general practices enabled by teams working across care settings.
4	Provided by independent general practices through a patient list	Patient choice and ease of access to a local general practice service. Local access to diagnostic and treatment services. Same high quality service offer and access for patients no matter where you live.
5	Separate GP practices provide in-hours for urgent patient need, high variation in access both in and out of hours.	Urgent in-hours care delivered at scale with access based on clinical need. Effectively streaming out the management of urgent and emergency care. Delivering care in the right place at the right time by the right care professional.
